

INVEST GLOBAL
MULTI-ASSET PRIME BROKERAGE

SENIOR DEVELOPER (IT)

About us

Invast Global is a specialist multi-asset prime broker based in Sydney and Tokyo. The company specialises in providing innovative prime services to hedge funds, asset managers, proprietary trading firms, other brokerages and banks.

As a world-leading boutique investment bank, we are constantly in search of hungry people to join the team and challenge the status quo. We want dreamers and doers who are ready to hit the ground running.

Why join us

- Remuneration - Invast Global offers a highly competitive base salary along with Short Term Incentive Schemes - which includes quarterly cash bonuses.
- Flexibility - We want to hire the best talent in the industry. To attract the best, we have embraced a flexible work culture.
- Career development - We don't just want to hire the best talent, we want to train them to be even better. Career development is a priority to you – so it's a priority for us.
- Unique workplace - Our Sydney office is nearby public transport & secure parking. The building boasts panoramic views across Sydney Harbour from our Wintergarden break out area.

About the role

Senior Developer to aid in transition to service based architecture.

The purpose of this role is to revamp several of Invast Global's proprietary back-office solutions. The plan is to systematically create new services which complement our existing applications such that current functionality is enhanced and new functionality can be added.

These processes largely involve the creation & implementation of data pipelines for trade and market data. The role will involve meeting project requirements to solve business problems within given timeframes. We also value the developer's opinion, and you will be able to provide contributions to both high- and low-level architectural discussions as desired.

In this process, much financial knowledge is there to be learnt if desired. A successful developer in this role can aspire to become a Team Leader in time. Invast provides a rewarding development experience as the impact of your work can be seen across the business day-in and day-out.

Level 27, Aurora Place, 88 Phillip Street, Sydney NSW 2000

Senior Developer Continued

Key duties and responsibilities

- On-time project delivery through hands-on development
- Continued improvement of existing applications
- Writing & understanding complex MySQL statements
- Helping in developing performance testing, capacity testing, and regression testing in continuous integration environments.
- Helping drive code reviews and contributing key cross-functional architectural decisions.

About you

- 3-5+ years professional development experience Java, Python, PHP, Node.JS, or Go
- Familiarity with the full-stack of software development
- Understanding of a complete CI/CD pipeline
- Strong experience with SQL database design & querying
- Strong experience with REST API construction & standards
- Experience with front-end frameworks, HTML, CSS, & JS
- Ability to read code what is not your primary language
- Experience with Jira, Confluence, Bitbucket a plus
- Experience with Kubernetes & Docker a plus

How to apply

To apply for this role, include your resume and cover letter outlining why you're perfect for this role.
